“OUR FAMILY SERVING YOUR FAMILY SINCE 1976”

## WHAT'S NEW

Fall is my favorite time of year. Fall sports have kicked off, harvest is in full swing, and we are finally getting some cooler weather.

Fall also means that winter is around the corner. This is a good time to think about preparing your diesel tanks for the cold temperatures that will soon arrive. We will add winter additives to your diesel fuel around the first week of November, so you are able to work to a threshold of about 5 degrees. If you plan on doing any fall work, this will prove beneficial for you. Once that work is complete, it is a good idea to blend 50% #1 diesel so the fuel will perform in the extreme cold. It's easy to forget that just because the tank is a 50/50 blend, the equipment you are putting it in is rarely empty. It's important to plan ahead. We want to make sure your equipment operates smoothly when you need it most.

Wishing you a bountiful and safe harvest. Thank you for your business!

Chad Kramer
